

# Coordinated Services Team Initiative Resource Handbook for New Sites

## Forward

---

This handbook represents the experiences of project directors, service coordinators, coordinating committee members, service providers, families, and consultants from collaborative systems of care across Wisconsin and the United States.

The purpose of this handbook is to serve as a guide for Counties and Tribes who are beginning the development of the Coordinated Services Team Initiative. This handbook represents an evolving resource that will change as new research, experiences and ideas are incorporated.

### **Acknowledgements:**
