

Coordinated Service Team Initiatives Data Requirements in the PPS MH Data System

(April 16, 2014)

The data elements below will be required for all CST's to submit to the State Department of Health Services starting on June 1, 2014. All of the data will be submitted electronically through the Mental Health Program Participation System (PPS). PPS is traditionally used for the submission of data for all children served in the county public mental health system. However, tribes and county Child Welfare agencies will also be given access as needed to the PPS system to submit CST data. A comparison between the new PPS MH data fields and the current CST Citrix data fields is provided to highlight the changes CST's must make to their assessment and data collection processes. The options available to submit the PPS data are listed in the last column. A few CST data elements can only be submitted through the PPS on-line data entry system.
